

Jermaine Antwi, Software Engineer

Software engineer with 5+ years of experience, passionate about building innovative solutions that make a difference. Looking to join a team that's working on something amazing!

Employment History

UX Engineer at CediRates, Accra

March 2023 — Present

As a UX engineer at CediRates, my primary responsibility was designing the user interfaces and then translating those designs into functional code. I worked closely with my team of developers to ensure that our website was visually appealing, intuitive, and provided a seamless user experience.

Software Engineer at Jubay Avenue, Accra

April 2018 — April 2023

As a software engineer at Jubay Avenue, I applied my skills to solve problems in the education, travel, and business sectors for a tour agency. I collaborated with a diverse team, staying up-to-date with industry trends and leveraging the latest technologies to create innovative solutions that had a positive impact on our clients.

Extra-curricular activities

Live Video Production at International Central Gospel Church, Accra

September 2022 — Present

As a valued member of the Youth Department at ICGC Christ Temple East, I played an instrumental role in supporting the technical needs of our weekly services. Specifically, I worked closely with a team to project slideshows, design graphics, display lyrics to enhance the worship experience for attendees and live-stream the sermons weekly. By leveraging my technical expertise and creativity, I helped to create a visually appealing and engaging atmosphere that contributed to the overall success of our services. Collaborating closely with my colleagues, I ensured that all technical aspects of the presentations were executed flawlessly, contributing to a seamless and impactful worship experience.
